SUMMARY

Highly motivated software engineer with 14+ years of experience spanning full-stack web development, distributed systems, and cloud-native architecture. Fast learner who takes ownership of products, thrives in cross-functional teams, and is equally effective as an independent contributor.

HIGHLIGHTS

- | | | |
|---------------------------|----------------------------|-----------------------|
| • Agentic development | • Agile/Scrum | • RESTful API design |
| • ASP.NET / .NET Core | • AWS (10+ services) | • BDD/TDD |
| • CI/CD (Jenkins, GitHub) | • CloudFormation / CDK | • Distributed systems |
| • Elasticsearch / DataDog | • Grafana / BigQuery | • gRPC |
| • Kafka | • Microservices | • ML model training |
| • MVC / MVVM | • NewRelic / observability | • React / Next.js |
| • System architecture | • Terraform | • UI/UX Design |

CERTIFICATIONS

AWS Certified Developer – Associate

EXPERIENCE

Software Engineer, Tech Lead *Mar 2024 – Present*

Triumph (TBK Bank, SSB) · Dallas, TX · Remote

- Lead and mentor engineers across junior–senior levels; conduct performance reviews and drive technical decision-making.
- Design and build distributed services (APIs, cron jobs, event handlers) for invoice factoring products in the transportation industry.
- Develop and maintain highly critical payment systems with a focus on reliability and correctness.
- Stack: .NET Core (C#), Ruby (on Rails), React, MSSQL, PostgreSQL; CI/CD via Azure DevOps; monitoring via NewRelic.
- Tech lead for a cross-team Okta IDP migration consolidating multiple identity providers into a single unified IDP, coordinating rollout across user segments without service disruption.
- Leveraged Claude Code for agentic development workflows, accelerating implementation pace and reducing time spent on boilerplate-heavy tasks.

Senior Software Engineer *Feb 2023 – Jan 2024*

Tilia, LLC. · San Francisco, CA · Remote

- Built and improved a virtual economy backend covering payments, invoicing, tax calculation, and PII management for a highly distributed Go-based platform.
- Owned full projects end-to-end, collaborated cross-team, and maintained week-long on-call rotations with DataDog/PagerDuty monitoring.
- Developed tooling and automation scripts in Python and Bash.

Senior Software Engineer *Jan 2020 – Nov 2022*

Mitek Systems, Inc. · San Diego, CA

- Served as technical lead for an internal KPI metrics platform supporting large-scale digital identity verification products.
- Built internal tooling for ML model training and development acceleration, primarily in Java, Python, and Go (with some C++), following strict production and security standards.
- Architected cost-effective AWS solutions and collaborated with Cloud Ops and product owners on system design.
- AWS services: APIGW, Athena, Batch, CDK, CloudFormation, CloudWatch, DynamoDB, ECS, EKS, IAM, Kinesis, Lambda, Route53, S3, SNS, SQS.

Full Stack Developer *Apr 2012 – Dec 2019*

Webitects.com (now defunct) · Chicago, IL

- Delivered 7+ years of full-stack web development — back end in ASP.NET / .NET Core (C#), front end in ReactJS, NextJS, Angular, and KnockoutJS.
- Built RESTful APIs and features including CMS platforms, file sharing systems, member management, and data visualization products.
- Integrated third-party payment processors, collaborated directly with clients, and onboarded and coached new engineers.

EDUCATION

B.S. Computer Science *May 2013*

Northeastern Illinois University · Chicago, IL

Concentration: Technical Programming · **Graduated summa cum laude**

LANGUAGES

English (Fluent) · German (Fluent) · Polish (Intermediate)
